**(54) METHOD FOR  
RECEIVING REQUEST  
FROM USER UTILIZING  
BROADCAST MEDIUM AND  
COMMUNICATION  
TERMINAL USED FOR THE  
METHOD**

(57) Abstract:

**PURPOSE:** To allow the user to place the order on a commodity by making automatic dial to a communication sales reception center in the communication sales service utilizing broadcast medium or the like.

**CONSTITUTION:** A communication sales reception center 1 makes contact of communication sales information such as a telephone number of the center, the number of commodities introduced in a broadcast and a sales period to a broadcast station 2. The broadcast station 2 inserts this communication sales information in a television signal to be broadcast and broadcasts the resulting signal. A communication sales information

extract device 5 extracts communication sales information from the television signal received by a television receiver 4 and sends the information to a communication terminal equipment 6. The communication terminal equipment 6 stores the communication sales information to a memory 61 and reads the communication sales information from the memory 61 when a dial switch 63 is depressed and makes automatically the telephone number of the communication sales reception center 1. Then the communication terminal equipment 6 receives detailed information of a commodity from the center 1 and the user depresses an order switch to send order data.
